> PROJECT WORK

TravelApp | Team Creator | <https://pinsy.netlify.app/>

June 2023

- Developed a dynamic, user-friendly travel app using React and PostgreSQL, allowing users to explore and plan trips effortlessly.
- Collaborated with a team to integrate front-end and back-end technologies for a seamless user experience.
- Designed and implemented a dynamic map feature, enhancing the app's usability and visual appeal.
- Integrated search functionality, enabling users to discover destinations, attractions, and create personalized itineraries.

NotNetflix | Sole Creator | <https://notflix63.netlify.app/>

June 2023

- Implemented various API endpoints for searching movies by trending, and filtering by genre, providing users with flexible and efficient access to movie data.
- Integrated third-party APIs to enrich movie information with additional data, including movie posters and trailers, enhancing the user experience and providing a comprehensive view of each movie.
- Developed search features, utilizing React, fetch, and the TMDB API allowing users to search shows and movies

Ski Game | Sole Creator | <https://asadrm63.github.io/game-project/>

May 2023

A ski game runner inspired by Ski Free with 2D gameplay..

- Created tracking of different objects using vanilla Javascript and advanced arithmetic creating interactive play
- Created swarm of enemies and in game polarity/gravity using vanilla Javascript and advanced arithmetic achieving difficult and slightly unpredictable gameplay

> PROFESSIONAL EXPERIENCE

Rahman Tax Service | Tax Assistant

July 2021 - Sept 2022

- Supported tax professionals in preparing and filing tax returns for individuals and businesses, streamlining processes and ensuring accurate documentation.
